- GTI recommends you bring your own clear resealable plastic bag to store your liquids/gels etc when proceeding through security as these are only available to purchase at the airport.

Please see www.aerlingus.com for full list of baggage fees and terms & conditions.

EU Aviation Cabin Baggage Security Regulations for all Passengers

EU aviation security regulations only permit containers of 100mls or less of liquids, gels, pastes, lotions and cosmetics to be brought through the passenger security screening points at all EU Airports.

Liquid items **MUST** be presented at the passenger security screening point in a **transparent re-sealable bag** (about the size of a small freezer bag), which itself must not exceed 1 litre in capacity (approximately 20cm x 20cm). The contents of the plastic bag must fit comfortably and the bag sealed.

Each passenger may carry only one such bag of liquids and the bag must be presented **separately** for examination at the airport security point.

Please note:

Any containers larger than 100ml (excluding essential medicines, see section below) will NOT be allowed through the security search point. Most liquids of any amount may still be carried in hold baggage.

One lighter per person may be carried through security. Lighters form part of the allowance of liquid in the

litre bag and can either be placed inside the litre bag or screened separately provided they would fit into the bag.

Remember that 'Liquids' includes: All drinks, including water, soup, syrups

Creams, lotions, oils, perfumes, mascara etc

Sprays and pressurized containers including shaving foam and spray deodorants

Pastes, including toothpastes

Gels, including hair and shower gel

Any other solutions and items of similar consistency

Please note that liquids can usually be purchased beyond airport security search points, in the departures area, as these liquids are subject to a separate screening process.

Essential medicines

Essential medicines for the period of the trip may be permitted in larger quantities above the 100ml limit, but will be subject to authentication. Passengers must produce supporting documentation from a relevant qualified medical professional.

Essential medical equipment

Passengers are permitted to carry through airport security medical equipment essential for use during the period of their trip. Where possible the equipment should be contained within the ONE item of cabin baggage and again should be accompanied by supporting documentation from a relevant qualified medical professional.

Baby Food

Liquid baby food or sterilised water, sufficient for the journey, can be taken through airport security. The accompanying adult will be required to verify by tasting.

Essential Liquid Dietary Foodstuffs

Liquid dietary foodstuffs which are deemed essential can be taken through airport security and will be subject to verification by the passenger.

Laptops / electrical items

Laptops and other large electrical items (e.g. a large hairdryer) have to be removed from cabin baggage and screened separately. A laptop bag that is not contained within the one piece of cabin baggage is regarded as the one allowable item of cabin baggage. We strongly recommend that if you must carry some liquids or other substances covered by the regulations in your hand luggage, you pack them in the required transparent, re-sealable bag...**BEFORE YOU SET OUT ON YOUR JOURNEY.**

NB This information is valid at the moment. Please note that airlines can and do change restrictions with regards to baggage.
